Description

The **2-Position Normally Open Switch with Key** is a device designed to provide efficient and safe control in electrical applications. This switch allows selection between two positions, facilitating the intuitive operation of electrical circuits. Its robust construction and ergonomic design ensure long-lasting and reliable use in industrial and commercial environments. The integrated security key provides an additional layer of protection, preventing unauthorized tampering and ensuring that only authorized personnel can make changes to the system configuration.

- **Selector Type:** 2-position normally open (NO)
- **Material:** Durable and robust plastic
- **Dimensions:** Compact, ideal for confined spaces
- **Installation:** Easy mounting on electrical panels
- **Connections:** Screw terminals for a secure connection
- **Operating Temperature:** Range of -10°C to 60°C
- **IP Rating:** IP65, dustproof and waterproof
- **Mechanical Life:** Up to 50,000 cycles
- **Color:** Black with light-colored accents
- **Certifications:** Complies with international safety standards
