

Product sheet

MAGNETOTERM 4-pole 6.3A circuit breaker for efficient electrical protection.

Brand: SCHNEIDER

Reference: IMPO GV2ME10

The 4-6.3A Magnetoterm Circuit Breaker is an electrical protection device designed to interrupt circuits in case of overload or short circuit. Its 4-6.3 amp capacity makes it suitable for various applications in electrical installations.

Description

The DISYUNT MAGNETOTERM 4-6.3A is an electrical protection device designed to safeguard electrical circuits from overloads and short circuits. This circuit breaker combines the function of a circuit breaker and a thermal switch, providing a fast and efficient response to electrical network failures. Its compact design allows for easy installation in electrical panels, making it ideal for residential and industrial applications. With a rated current capacity of 4 to 6.3 amps, this device ensures safe and reliable operation under various load conditions.

- **Type:** Miniature circuit breaker
- **Current range:** 4-6.3 A
- **Rated voltage:** 230/400 V
- **Tripping curve:** B (for resistive and capacitive loads)
- **Protection:** Overload and short circuit
- **Mounting:** DIN rail
- **Dimensions:** Compact to optimize space in the electrical panel
- **Material:** Fire-resistant plastic housing
- **Certifications:** Complies with international safety standards
- **Life Useful:** High durability and reliability over time

Specifications

Rated current (A)	6
EAN	3389110343113
No. of poles	4P
Reference	SCHNEIDER GV2ME10
