SCHNEIDER 24/48 D 9 A 38A Variable Filter - Adjustable and versatile current range.

Brand: SCHNEIDER

Reference: IMPO LAD4VE

The 24/48 D 9 A 38A variable filter allows you to adjust the light density for various photographic applications. Its versatile design makes it compatible with different lenses, offering precise control over exposure and improving image quality.

Description

The 24/48 D 9 A 38A Variable Filter is a device designed to optimize the performance of electrical systems by providing efficient current regulation. This filter is ideal for industrial and commercial applications where precise power control is required. Its robust construction and advanced technology ensure a long service life and reliable operation under diverse operating conditions. With a current handling capacity ranging from 9 to 38 amps, this filter adapts to different needs, ensuring effective protection against voltage spikes and fluctuations in the electrical grid.

- **Current Range:** 9 A to 38 A
- **Filter Type:** Variable 24/48 D
- **Applications:** Industrial and Commercial Electrical Systems
- **Protection:** Against voltage spikes and fluctuations
- **Construction:** Robust and Durable
- **Installation:** Quick and Easy
- **Compatibility:** With various electrical systems
- **Performance:** High Energy Efficiency
- **Certifications:** Complies with safety regulations
- **Dimensions:** Compact for easy integration

Specifications

Rated current (A)	9
Curve	D
EAN	3389110385496
Reference	SCHNEIDER LAD4VE
