

Product sheet

SCHNEIDER iC60N automatic switch 1 pole + neutral 10A and protection B.

Brand: SCHNEIDER

Reference: IMPO A9F78610

The iC60N 1P+N 10A B is a circuit breaker designed to protect electrical circuits. It offers a current capacity of 10 amps and features a single-pole plus neutral configuration, ideal for residential and commercial applications.

Description

The iC60N 1P+N 10A B is a high-quality circuit breaker designed to provide protection and control in residential and industrial electrical installations. This device is ideal for applications requiring efficient current management, ensuring the safety and proper functioning of electrical circuits. Its compact and robust design allows for easy integration into electrical panels, while its advanced technology ensures reliable and long-lasting performance. The iC60N features a quick-disconnect system that protects against overloads and short circuits, contributing to the overall safety of the installation.

- **Device type:** Circuit breaker
- **Poles:** 1P+N (single-phase with neutral)
- **Rated current:** 10A
- **Rated voltage:** 230V AC
- **Tripping curve:** B (for resistive and small inductive loads)
- **Overload protection:** Yes
- **Short-circuit protection:** Yes
- **Dimensions:** 18 mm wide per module
- **Installation:** DIN rail mounting
- **Certifications:** Complies with international safety standards

Specifications

Rated current (A)	10
Curve	B
EAN	3606480093043
No. of poles	1P+N
Reference	SCHNEIDER A9F78610
