Description

The RET.MEC 110V D 9-38A is a versatile device designed to offer precise and efficient control in electrical applications. This unit allows for manual or automatic operation, adapting to the specific needs of each user. Its robust construction and high-quality components guarantee reliable performance under diverse working conditions. With a current range of 9 to 38 amps, this device is ideal for a wide range of projects, from residential installations to industrial applications. Its intuitive design makes setup and use easy, ensuring that both professionals and hobbyists can take full advantage of its capabilities.

- **Operating Voltage:** 110V
- **Current Range:** 9-38A
- **Operating Modes:** Manual and Automatic
- **Construction:** High-quality materials for durability
- **Compatibility:** Suitable for various electrical applications
- **Ease of Use:** Intuitive design for quick setup
- **Safety:** Overload and short-circuit protection
- **Dimensions:** Compact for easy installation
- **Weight:** Lightweight for easy transport
- **Certifications:** Complies with safety regulations electric

Specifications

Rated current (A)	38
EAN	3389110842388
Reference	SCHNEIDER LAD6K10F
Nominal voltage (V)	110
