Ethernet Interface Module (IFE) + Gateway + Quick Connect + Compatible with IP Networks

Brand: SCHNEIDER

Reference: IMPO LV434002

Ethernet Interface Module (IFE) with gateway, designed to facilitate the connection of devices to Ethernet networks. Ideal for applications requiring efficient and stable communication. Compatible with various configurations, it offers a practical solution for integrating technology into industrial and commercial environments.

Description

The IFE Ethernet Interface Module + Gateway is an advanced solution designed to facilitate communication and control of devices in industrial and commercial environments. This module enables system integration via an Ethernet connection, ensuring fast and efficient data transmission. Its compact and robust design makes it ideal for applications where space and durability are key factors. With flexible configuration capabilities, the IFE adapts to diverse needs, allowing for easy implementation in existing systems.

- **Connectivity:** Ethernet interface for data communication.
- **Compatibility:** Supports multiple communication protocols.
- **Temperature Range:** Operates in a wide temperature range.
- **Power Supply:** Operates with industry-standard voltages.
- **Dimensions:** Compact design for easy integration.
- **Security:** Advanced security features to protect information.
- **Configuration:** Intuitive user interface for easy configuration.
- **LED Indicators:** Visual signals for operating status.
- **Technical Support:** Assistance available for installation and configuration.
- **Certifications:** Complies with international quality and safety standards.
