

Product sheet

ACTI9 4-pole 40A 30mA type B differential switch for electrical protection.

Brand: SCHNEIDER

Reference: IMPO A9Z51440

The Acti9 - lid 4P 40A 30mA B EV is a residual current device (RCD) designed to protect electrical installations. With a 40A capacity and 30mA sensitivity, it ensures safety in electrical systems, making it ideal for residential and commercial applications.

Description

The Acti9 - lid 4P 40A 30mA B EV is a protective device designed to ensure safety in electrical installations, especially in environments requiring high efficiency and reliability. This 4-pole residual current circuit breaker (RCCB) is designed to detect and disconnect earth leakage currents, thus protecting both people and connected equipment. Its 40A capacity and 30mA sensitivity make it an ideal choice for residential and commercial applications, as well as for electric vehicle charging. Its compact and robust design allows for easy installation in electrical panels, ensuring optimal performance at all times.

- **Type:** 4-pole residual current circuit breaker
- **Rated current:** 40A
- **Leakage current:** 30mA
- **Application:** Protection of electrical installations and charging of electric vehicles
- **Standards:** Complies with current safety regulations
- **Installation:** Easy mounting in electrical panels
- **Dimensions:** Compact to optimize space
- **Material:** Robust construction for greater durability
- **Operating temperature:** Wide range for diverse environmental conditions
- **Certifications:** Certified according to international standards

Specifications

Rated current (A)	40
Sensitivity	30 mA
EAN	3606489502799
No. of poles	4P

Reference	SCHNEIDER A9Z51440
