Acti9 4P 63A 30mA B EV Switch - High Efficiency Differential Protection

Brand: SCHNEIDER

Reference: IMPO A9Z51463

The Acti9 - lid 4P 63A 30mA B EV is an electrical protection device designed for AC systems. It offers a capacity of 63A and a sensitivity of 30mA, ensuring safety and efficiency in electrical installations.

Description

The Acti9 - lid 4P 63A 30mA B EV is a protective device designed to ensure safety in electrical installations, especially in environments requiring high current capacity and earth fault protection. This 4-pole residual current circuit breaker combines advanced technology with a robust design, ensuring reliable and long-lasting performance. Its 63A capacity and 30mA sensitivity make it ideal for residential and industrial applications, as well as for electric vehicle charging, providing a comprehensive solution for electrical circuit protection.

- **Device Type:** Residual Current Circuit Breaker (RCCB)
- **Poles:** 4P (four poles)
- **Rated Current:** 63A
- **Leakage Current:** 30mA
- **Applications:** Residential and industrial, electric vehicle charging
- **Protection:** Against earth faults
- **Standards:** Complies with current electrical safety regulations
- **Installation:** Easy installation in standard electrical panels
- **Durability:** Robust design for prolonged use
- **Compatibility:** Compatible with other devices in the Acti9 range

Specifications

Rated current (A)	63
Sensitivity	30 mA
EAN	3606489502805
No. of poles	4P
Reference	SCHNEIDER A9Z51463
