

Product sheet

13-18A MAGNETOTHERMAL motor circuit breaker with protection and automatic disconnection.

Brand: SCHNEIDER

Reference: IMPO GV2RT20

This 13-18A motor circuit breaker is designed to protect electrical circuits from overloads and short circuits. Its robust construction ensures reliable performance in industrial and commercial applications, guaranteeing the safety and stability of the electrical system.

Description

The 13-18A thermal-magnetic motor circuit breaker is an essential device for protecting electric motors in industrial and commercial applications. Its robust and efficient design allows for automatic circuit disconnection in case of overload or short circuit, thus ensuring equipment safety and service continuity. This circuit breaker combines thermal and magnetic protection functions, making it a comprehensive solution for energy management in electrical systems. Its installation is simple and it adapts to different electrical panel configurations, ensuring optimal performance under diverse operating conditions.

- **Current range:** 13 - 18A
- **Protection type:** Thermal-magnetic circuit breaker
- **Applications:** Protection of electric motors
- **Automatic disconnection:** In case of overload or short circuit
- **Installation:** Quick and easy on electrical panels
- **Standards:** Complies with international safety standards
- **Dimensions:** Compact to optimize panel space
- **Material:** Impact-resistant housing
- **Operating temperature:** Wide range for diverse environmental conditions
- **Lifespan:** Long life with minimal maintenance

Specifications

Rated current (A)	18
EAN	3389110520712
Reference	SCHNEIDER GV2RT20
