Product sheet

PowerTag UNIVERSAL 3P+N switch with connectivity and easy installation.

Brand: SCHNEIDER

Reference: IMPO A9MEM1570

The PowerTag Universal 3P+N is an energy measurement device that allows you to monitor electrical consumption in three-phase installations. Its compact design facilitates installation in electrical panels, providing accurate data for efficient energy management.

Description

The PowerTag Universal 3P+N is an energy measurement and control device designed to optimize electricity consumption in industrial and commercial facilities. This innovative device allows for real-time monitoring of energy consumption, facilitating the identification of usage patterns and the implementation of energy-saving strategies. Its compact and modular design allows for easy integration into existing electrical panels, ensuring quick and efficient installation. Furthermore, the PowerTag Universal is compatible with various network configurations, making it a versatile solution for different applications.

- **Device Type:** Energy Meter
- **Connection:** 3-phase + neutral (3P+N)
- **Measurement Range:** Up to 63 A
- **Communication:** Modbus and TCP/IP communication protocols
- **Dimensions:** Compact, ideal for electrical panels
- **Installation:** Easy DIN rail mounting
- **Monitoring:** Real-time measurement of voltage, current, and power
- **Compatibility:** Integration with energy management systems
- **Certifications:** Complies with international safety standards
- **Applications:** Ideal for industries, businesses and commercial buildings

Specifications

EAN	3606481380432
No. of poles	3P+N
Reference	SCHNEIDER A9MEM1570
