Product sheet

LEICA automatic optical level, 20x magnification, 2.5 mm deviation, distinctive design.

Brand: Leica Geosystems

Reference: TUR 840381-L

The Leica NA320 automatic optical level offers 20x magnification and a deviation of 2.5 mm, ensuring fast and accurate measurements. Its robust and ergonomic design makes it ideal for harsh construction site conditions, guaranteeing reliability and quality.

Description

The Leica NA320 automatic optical level is an essential tool for construction professionals seeking precision and reliability in their daily leveling tasks. With 20x magnification and a deviation of only 2.5 mm, this device combines a distinctive design with proven technology, guaranteeing high-quality results in any working environment.

The Leica NA300 range has been designed to overcome the challenges encountered on construction sites. Its robust and ergonomic design allows for comfortable handling, while its rugged construction ensures optimal performance even in adverse conditions. This automatic level is ideal for both basic tasks and more complex applications, offering a versatile solution for any leveling need.

The high-precision mirror facilitates horizontal level adjustment, ensuring quick and accurate measurements. Furthermore, the IP54 rating provides additional protection, allowing the device to operate effectively in harsh environments.

With over 270 Leica Geosystems service centers worldwide, users can rely on unparalleled support wherever they are.

- Magnification: 20x
- Deviation:
