Product sheet

LEICA automatic optical level with 32x magnification and 1.8 mm deviation.

Brand: Leica Geosystems

Reference: TUR 840383-L

The Leica NA332 automatic optical level offers 32x magnification and 1.8 mm deviation, ensuring fast and accurate measurements. Its robust and ergonomic design makes it ideal for leveling tasks in demanding conditions.

Description

The Leica NA332 automatic optical level from Leica Geosystems is a tool designed to meet the leveling requirements of any construction site. With 32x magnification and a deviation of only 1.8 mm, this level combines a distinctive design with proven technology, guaranteeing precise and reliable results with every measurement. Its robustness and ergonomics make it an indispensable tool for construction professionals.

The Leica NA300 range stands out for its exclusivity, precision, and simplicity. Its unique design allows it to adapt to various applications in the construction field, offering comfortable handling and high-quality results. Precision is fundamental in this level, which has been specially designed for daily leveling tasks, ensuring reliability even in the most adverse conditions.

The ease of adjusting the horizontal level, thanks to its perfectly designed mirror, allows for measurements with maximum precision. Furthermore, Leica Geosystems backs its product with more than 270 service centers worldwide, guaranteeing peace of mind and support wherever needed. The IP54 standard ensures that measurements maintain their quality, even in harsh environments. Magnification: 32x Deviation: 1.8 mm Shortest sighting distance:
