LEICA 30x magnification optical level, a durable and precise instrument

Brand: Leica Geosystems

Reference: TUR 833190

The Leica NA730 PLUS optical level offers 30x magnification, ensuring precise measurements in challenging construction environments. Its water- and dust-resistant design, along with high brightness, guarantees reliable results in any condition. Ideal for professionals.

Description

The **30x magnification NA730 PLUS optical level** from Leica Geosystems is an instrument designed to deliver superior performance in the most challenging construction environments. With exceptional robustness and unmatched measurement accuracy, this optical level adapts to diverse weather conditions, ensuring reliable results in both rain and shine. Its rugged design ensures that vibration from heavy machinery does not affect measurement accuracy, allowing professionals to save time and resources by avoiding constant adjustments.

The advanced technology used in the manufacture of the NA730 PLUS, along with high quality standards, has earned it an outstanding reputation worldwide.

Measurement readings are clearly displayed next to the objective lens, in degrees or gons, facilitating its use in different working situations.

Key features include:

- Graduation: 360 degrees/400 gon
- Multiplication constant: 100
- Addition constant: 0
- Bubble level: 10'/2 mm
- Compensator tilt range: $\pm 15'$
- Drop resistance: ISO 9022-33-5
- Protection: IP57 (total immersion)
- Operating temperature range: -20°C to +50°C

- Nitrogen-filled lens to prevent fogging
- High brightness for accurate readings in low-light conditions

The NA730 PLUS is undoubtedly an indispensable tool for professionals seeking precision and durability in their measurements.

Specifications

EAN	7640116957084
Weight (kg)	1,7000
