hh 2" check valve

Brand: VERHAL

Reference: EDM 01395

The 2" hh check valve is an essential component for hydraulic systems, designed to prevent backflow. With a pressure rating of 16 bar, this valve is reinforced for durability. Its brass seat and stainless steel spring ensure efficient and long-lasting operation. Ideal for applications requiring precise fluid flow control.

Description

The **hh 2" check valve** is an essential component for piping systems requiring efficient liquid flow control. Designed to withstand a nominal pressure of **16 bar**, this non-return valve is manufactured from high-quality materials that guarantee its durability and performance. Its **brass seat** provides excellent corrosion resistance, while the **stainless steel spring** ensures reliable and long-lasting operation. The reinforced construction of this valve makes it ideal for industrial and commercial applications where safety and efficiency are paramount.

- **Type:** hh check valve
- **Size:** 2"
- **Nominal Pressure:** 16 bar
- **Material:** Brass seat/Stainless steel spring
- **Features:** Reinforced

This valve is a reliable solution for preventing fluid backflow, thus ensuring the integrity of the piping system. Its design allows for easy installation and minimal maintenance, making it a practical option for various plumbing and engineering applications.

Specifications

EAN	8436048516852
Material	Asiento de latón / muelle acero inox

Measures	2"
