Description

The 760 A1 Filter is a device specifically designed for protection against gases and vapors from chemical compounds. Its structure consists of a cylindrical body made of black ABS, ensuring high resistance and durability. This filter is complemented by a cap made of the same material, guaranteeing a perfect fit and proper airtightness during use. Complies with EN 14387:2004 + A1:2008, certifying its effectiveness and safety in work environments where hazardous chemicals are handled.

- **Type:** Threaded filters
- **Standard:** EN 14387:2004 + A1:2008
- **Material:** High-strength ABS
- **Color:** Black
- **Design:** Cylindrical body
- **Compatibility:** Designed to fit with caps of the same material
- **Use:** Protection against chemical gases and vapors
- **Applications:** Industrial and work environments
- **Durability:** High resistance to chemicals
- **Certification:** Meets European safety standards
