Resifix polyester py410 chemical wad, 410 ml

Brand: CELO

Reference: EDM 48012

The Resifix PY410 polyester chemical anchor, 410 ml, is CE marked and ideal for applications in uncracked concrete and masonry (M8 - M16). This product guarantees high loads and allows for installation without expansion forces in anchor rods, bolts, square tubes, and screws. Furthermore, it is suitable for damp or water-filled holes, making it a versatile option for various fixing needs.

Description

The Resifix PY410 polyester chemical anchor is a CE-approved product specifically designed for applications in uncracked concrete and masonry, with an anchoring range of M8 to M16. This chemical anchor guarantees the ability to withstand high loads, making it an ideal solution for installing anchor rods, anchor bolts, square tubes, studs, and screws. Its advanced formulation allows for installation free of expansion forces, ensuring a secure and long-lasting fix. Furthermore, it is suitable for use in wet or water-filled boreholes, which expands its versatility in different working conditions.

- **Quantity:** 410 ml
- **Application:** Uncracked concrete and masonry (M8 - M16)
- **Features:** Suitable for wet or water-filled boreholes
- **Type:** Resifix polyester chemical anchor PY410
- **Approval:** CE
- **Load capacity:** High
- **Installation:** Free from expansion forces
- **Uses:** Anchor rods, bolts, square tubes, screws
- **Conditions of use:** Wet boreholes
- **Format:** 410 ml
