Description

The 370ml rectangular airtight borosilicate lunchbox is the ideal solution for storing and transporting food. Made of borosilicate glass, this container is highly resistant to temperature changes, making it suitable for use in microwaves and ovens. Its rectangular design optimizes space in the refrigerator and backpack, allowing for efficient organization of your meals. The airtight lid ensures food stays fresh and prevents spills, making it a practical choice for taking to work, school, or on picnics.
