Description

The 115 mm segmented laser dry cutting diamond blade is a tool designed to offer optimal performance in various cutting applications. Its advanced construction allows for efficient use on hard materials, guaranteeing precise and durable cuts.

- Disc diameter: 115 mm
- Main material: Diamond inserts
- Secondary material: Steel
- Cutting type: Dry laser segmentation
- Revolutions per minute (RPM): 13,200
- Bore diameter: 22.23 mm
- Applications: Concrete, bricks, tiles, ceramics

Specifications

EAN	8435223400597
Manufacturer	GSC
Material	Diamond inserts
Weight (kg)	0.15
