Hexagonal plug with M-5 female thread and GAS threads for secure connections

Brand: COFAN

Reference: COF 06170015-U

The M-5 female threaded hexagonal plug is a versatile fitting designed for applications requiring a secure seal. Made from high-quality materials, it features GAS threads that ensure a proper connection. Its hexagonal design allows for easy handling and adjustment. Ideal for use in piping systems and machinery, this plug is a practical and efficient solution for preventing leaks and maintaining system integrity.

Description

The M-5 female threaded hexagonal plug is an essential component for industrial and plumbing applications requiring a secure and efficient seal. Manufactured from high-quality materials, this plug is designed to provide a robust and durable connection in piping systems. Its hexagonal design allows for easy handling and simple installation, ensuring a precise fit on GAS threads. This plug is ideal for use in a variety of environments, from mechanical workshops to plumbing installations.

- **Type:** Hexagonal plug with female thread
- **Size:** M-5
- **Thread:** Female, compatible with GAS threads
- **Material:** Stainless steel (or other specific material depending on the product)
- **Applications:** Plumbing, mechanical, hydraulic systems
- **Resistance:** High resistance to corrosion and wear
- **Installation:** Easy installation with standard tools
- **Standards:** Meets relevant industry standards
- **Dimensions:** [Include specific dimensions if required]
- **Sales:** Individual unit

This hexagonal plug is a reliable solution for ensuring a leak-proof seal in various applications, offering optimal performance and a long service life.

Specifications

Width	1
EAN	8445187410730

Manufacturer	COFAN
Weight (kg)	0,005
