R-1/2 female threaded hexagonal plug with GAS threads for secure connections

Brand: COFAN

Reference: COF 06170019-U

The R-1/2 female threaded hexagonal plug is an accessory designed to seal GAS threaded connections. Made of durable materials, it ensures a secure and efficient fit. Its hexagonal design allows for easy handling and installation. Ideal for plumbing and piping applications, this plug is a practical solution for preventing leaks and maintaining the integrity of connections. Sold individually.

Description

The R-1/2 female threaded hexagonal plug is an essential component for piping systems requiring a secure and efficient closure. Precision-engineered, this plug is made of high-quality materials that ensure durability and corrosion resistance. Its hexagonal design allows for easy handling and simple installation, and it is compatible with GAS threads, making it a versatile option for various industrial and domestic applications.

- **Product Type:** Hexagonal Plug with Female Thread
- **Thread:** R-1/2
- **Compatibility:** GAS Threads
- **Material:** Stainless steel (or other specific material depending on the product)
- **Dimensions:** R-1/2 (specify dimensions if necessary)
- **Use:** Sealing pipes and fluid systems
- **Resistance:** High resistance to corrosion and wear
- **Installation:** Easy installation with standard tools
- **Applications:** Ideal for industrial and domestic use
- **Sale:** Individual Unit

This hexagonal plug is a reliable solution for those seeking an effective seal in their piping systems, ensuring optimal performance under various working conditions.

Specifications

Width	1
EAN	8445187410792

Manufacturer	COFAN
Weight (kg)	0,01
Thread	1/2"
