Product sheet

Metal cylindrical reducer R1/8 to M5, thread for secure connections.

Brand: COFAN

Reference: COF 06190001-U

The R1/8 - M5 cylindrical reducer is a metal fitting designed for threaded connections. This product allows for the adaptation of different pipe diameters, offering various sizes to meet diverse needs. Its robust construction ensures durability and resistance in industrial and domestic applications. Ideal for plumbing projects and fluid systems, this reducer is sold individually, facilitating its acquisition according to the user's specific requirements.

Description

The R1/8 - M5 Cylindrical Reducer is a metal fitting designed to facilitate the connection of pipes and hoses in hydraulic and pneumatic systems. This component is ideal for applications requiring a thread transition from one diameter to another, ensuring an efficient seal and easy installation. Its robust construction ensures high resistance to pressure and corrosion, making it a reliable choice for various industries.

- **Material:** High-quality metal
- **Connection type:** Cylindrical thread
- **Inlet diameter:** R1/8
- **Outlet diameter:** M5
- **Maximum pressure:** Suitable for high pressures
- **Operating temperature:** Wide temperature range
- **Finish:** Treated surface for durability
- **Compatibility:** Ideal for hydraulic and pneumatic systems
- **Installation:** Quick and easy, no special tools required
- **Standards:** Meets industry standards

This fitting is a versatile and efficient solution for those seeking quality and performance in their connection systems.

Specifications

Width	0
EAN	8445187410891
Manufacturer	COFAN
Weight (kg)	0,006
