

## Product sheet

## Metal cylindrical reducer R1 - R3/8, threaded, sold individually, various sizes

Brand: COFAN

Reference: COF 06190011-U

The R1 - R3/8 cylindrical reducer is a threaded metal fitting designed to facilitate the connection between pipes of different diameters. Available in various sizes, this product ensures a secure and efficient connection in plumbing systems and other industrial applications. Its robust construction guarantees durability and resistance under diverse conditions. Ideal for projects requiring pipe dimension adjustments. Sold individually.

### Description

The R1 - R3/8 Cylindrical Reducer is a metal fitting designed to facilitate the connection of pipes with different diameters using a threaded system. This component is ideal for applications in hydraulic and pneumatic systems, guaranteeing a secure and efficient connection. Its robust construction ensures a long service life, even under high pressure and temperature conditions. The versatility of this fitting allows its use in various industries, from construction to automotive.

- **Material:** High-strength metal
- **Connection type:** Cylindrical thread
- **Available sizes:** Various options to suit different needs
- **Maximum pressure:** Suitable for high-pressure applications
- **Operating temperature:** Resistant to extreme temperatures
- **Compatibility:** Ideal for hydraulic and pneumatic systems
- **Installation:** Easy to install with standard tools
- **Durability:** High corrosion resistance
- **Standards:** Meets industry standards
- **Use:** Recommended for industrial and commercial applications

The Reduction Cylindrical R1 - R3/8 is a reliable solution for those seeking quality and performance in their piping systems.

### Specifications

|       |               |
|-------|---------------|
| Width | 3             |
| EAN   | 8445187411027 |

|              |       |
|--------------|-------|
| Manufacturer | COFAN |
| Weight (kg)  | 0,05  |
