Product sheet

Metal cylindrical reducer R1 - R1/2, threaded, various sizes available

Brand: COFAN

Reference: COF 06190012-U

The R1 - R1/2 Cylindrical Reducer is a metal fitting designed for threaded connections. This product allows for the adaptation of different diameters in piping systems, ensuring a secure and efficient fit. Available in various sizes, it is ideal for industrial and plumbing applications. Its robust construction ensures durability and resistance under diverse operating conditions. It is sold individually, facilitating procurement according to specific project needs.

Description

The R1 - R1/2 Cylindrical Reducer is a metal fitting designed to facilitate the connection of pipes with different diameters using a threaded system. This component is ideal for applications in hydraulic and pneumatic systems where an efficient transition between two pipe sizes is required. Its robust construction guarantees a long service life and resistance to adverse conditions, ensuring optimal performance in various installations.

- **Material:** High-quality galvanized steel
- **Connection type:** Cylindrical thread
- **Available sizes:** Various options to suit different needs
- **Maximum pressure:** Suitable for high-pressure applications
- **Operating temperature:** Resistant to extreme temperatures
- **Standards:** Meets international quality standards
- **Installation:** Easy to install, no special tools required
- **Compatibility:** Compatible with standard piping systems
- **Finish:** Treated surface for increased corrosion resistance
- **Use:** Ideal for industrial and commercial

The R1 - R1/2 Cylindrical Reducer is a reliable solution for optimizing connectivity in piping systems, ensuring efficient and safe flow.

Specifications

Width	4
EAN	8445187411041
Manufacturer	COFAN
Weight (kg)	0,088
