Metal cylindrical reducer R1 - R3/4, threaded, various sizes available

Brand: COFAN

Reference: COF 06190013-U

The R1 - R3/4 cylindrical reducer is a threaded metal fitting designed to facilitate the connection of pipes of different diameters. Available in various sizes, this product is ideal for plumbing systems and other installations. Its robust construction ensures durability and strength, guaranteeing a secure and efficient fit. It is sold individually, allowing you to purchase the quantity needed for each project.

Description

The R1 - R3/4 Cylindrical Reducer is a metal fitting designed to facilitate the connection of pipes with different diameters using a threaded system. This component is ideal for applications in hydraulic and pneumatic systems, ensuring a secure and efficient connection. Its robust construction ensures a long service life, while its design allows for quick and easy installation, adapting to various pipe configurations.

- **Material:** Made of high-quality steel for greater strength.
- **Connection Type:** Cylindrical thread, compatible with industry standards.
- **Available Sizes:** Various options to suit different needs.
- **Maximum Pressure:** Withstands high pressures, ideal for demanding environments.
- **Operating Temperature:** Suitable for a wide temperature range.
- **Finish:** Surface treated to prevent corrosion.
- **Applications:** Uses in water, air, and other fluid systems.
- **Standards:** Meets quality and safety standards.
- **Installation:** Requires basic tools for assembly.
- **Sales Unit:** Sold individually, ideal for projects of any scale.

The R1 - R3/4 Cylindrical Reducer is a reliable solution for those seeking quality and durability in their pipe connections.

Specifications

Width	3
EAN	8445187411058

Manufacturer	COFAN
Weight (kg)	0,057
