White rectangular catadioptric 106 x 50 mm with adhesive for easy installation

Brand: COFAN

Reference: COF 21201165

The 106 x 50 mm white rectangular reflector is designed to improve vehicle visibility in low-light conditions. Made of high-quality PMMA, it reflects light from other sources, increasing road safety. This model includes an adhesive backing and two holes for screw mounting (screws not included), allowing for versatile installation on vehicles, trailers, or machinery. Its durability and ease of installation make it ideal for a variety of applications.

Description

The **Rectangular White Reflector 106 x 50 mm** is an approved device designed to improve vehicle visibility in low-light conditions. This model, which is mounted on the front of the vehicle, fulfills an essential signaling function, increasing contrast and visibility in critical situations such as nighttime or foggy days. Unlike other devices, reflectors do not emit their own light; instead, they reflect light received from external sources, allowing them to return the incident light to its origin, thus contributing to road safety.

Made of high-quality **PMMA (polymethyl methacrylate)**, these reflectors are resistant to wear and weathering, ensuring their functionality and appearance over time.

This model includes two installation options: an adhesive backing and two holes for screw mounting (screws not included), making it easy to attach to vehicles, machinery, trailers, or signage.

- Dimensions: 106 x 50 mm
- Color: White (for front mounting)
- Material: High-quality PMMA
- Installation: Adhesive or screw-on
- Approved for road use
- Weather resistant
- High durability
- Improves visibility in low-light conditions
- Ideal for cars, trucks, trailers, and machinery

- Effective reflective surface

Specifications

Width	5
Colour	White
EAN	8445187467239
Manufacturer	COFAN
Weight (kg)	0,028
