

Product sheet

90° elbow connection for irrigation, 16mm diameter, easy assembly without tools.

Brand: COFAN

Reference: COF 90016054-U

90° Elbow Connector Ø16MM, ideal for drip irrigation systems in agriculture and gardening. Its splined design facilitates tool-free assembly, ensuring secure, leak-free connections. It allows for various connection combinations, adapting to different irrigation types. Made of durable material, this connector performs well in harsh environmental conditions, making it essential for creating efficient circuits in irrigation systems. Sold individually.

Description

The **90° Elbow Connector Ø16mm** is a connector specifically designed for drip irrigation systems, ideal for both agricultural and gardening applications. Its grooved design facilitates assembly, allowing hose sections to be joined quickly and efficiently without the need for additional tools. This elbow connector is essential for creating various combinations in irrigation system connections, adapting to the specific needs of each installation. Its robust structure guarantees a secure seal, minimizing the risk of leaks and ensuring a constant and controlled water flow.

The use of elbow connectors is fundamental for creating functional circuits in irrigation systems, allowing for optimized water use and improved irrigation efficiency.

Made with high-strength materials, this connector is capable of withstanding harsh environmental conditions, ensuring its long-term durability and functionality.

- Diameter: Ø16MM
- Angle: 90 degrees
- Material: Durable plastic
- Knurled design for easy assembly
- Compatible with drip irrigation systems
- Minimizes the risk of leaks
- Ideal for agriculture and gardening
- Allows for various connection combinations

- Resistant to harsh environmental conditions
- Sold individually

Specifications

Width	4
EAN	8445187426359
Manufacturer	COFAN
Weight (kg)	0,004
