

Product sheet

Double ring plug for irrigation hose Ø16mm, easy installation and durable.

Brand: COFAN

Reference: COF 90016063-U

The 16mm PE double ring plug is an ideal connector for irrigation systems. Designed to shut off the water flow, it allows for easy installation by simply inserting the irrigation tubing into the rings. This fitting is suitable for gardening and agriculture, and is made of durable, resistant materials that adapt to various environments. Its functional design ensures efficient irrigation management. Sold individually.

Description

The PE Ø16MM double ring plug is a connector specifically designed for irrigation systems, offering an efficient solution for controlling water flow in your irrigation lines. This fitting allows you to easily and effectively shut off the water supply, ensuring optimal use of water resources in gardening and agriculture. Installation is intuitive: simply insert the irrigation pipe through one of the rings, bend the pipe, and then insert the other end into the second ring. This practical design facilitates handling and adaptation to different irrigation configurations.

Made with high-quality materials, the double ring plug is sturdy and durable, ensuring its functionality in various environments and weather conditions.

Its robust construction minimizes the risk of leaks and ensures reliable long-term performance.

- Diameter: Ø16MM
- Material: High-density polyethylene
- Type: Double ring connector
- Use: Irrigation systems in gardening and agriculture
- Installation: Quick and easy
- Durability: High durability and resistance to weather conditions
- Compatibility: Adapter for standard irrigation hoses
- Leak prevention: Design that ensures a watertight seal
- Applications: Ideal for cutting off the water flow in irrigation lines
- Color: Black

Specifications

Width	2
EAN	8445187426489
Manufacturer	COFAN
Weight (kg)	0,002
