COMPACT 160A 24-30V DC electric controller, standard control and fixed mounting, 700 ms response

Brand: SCHNEIDER

Reference: IMPO LV429436

The MT250 electric control unit, part of the ComPact NSX range, is designed to operate with voltages from 24 to 30 V DC. Its standard control and fixed mounting ensure efficient and safe operation, and it is compatible with multiple circuit breaker models, making it ideal for industrial and commercial applications.

Description

The MT250 electric control is a component of the ComPact range, designed to offer efficient control in direct current electrical systems. This device stands out for its compatibility with various variants of the ComPact NSX series, making it a versatile option for industrial and commercial applications.

- Product range: ComPact NSX400...630, ComPact NSX100...250 DC new generation
- Product type: Electric control
- Application: Automatic spring charging
- Compatibility: ComPact NSX160, NSX250, NSX100m Micrologic Vigi 4.1, among others
- Control type: Standard
- Control circuit voltage: 24...30 V DC
- Rated current: 160 A and 100 A
- Mounting type: Fixed
- Response time:
