Description

The Energy Absorber Set Model 31-a provides an effective solution for energy management in electrical systems. Its innovative design allows for easy integration into various applications, ensuring optimal performance.

Recommended for industrial and commercial installations, this product meets the highest standards. Its technical specifications ensure a long lifespan and reliable operation.

- Model: 31-a
- Compatibility: Standard electrical systems
- Material: High resistance
- Use: Indoor and outdoor

Don't miss the chance to enhance your electrical system. Get yours today!
