Description

The pack of 250 M-6 conical serrated washers is the perfect solution for securing electrical and mechanical connections. These washers are designed to evenly distribute the load, enhancing the reliability of joints.

Recommended for use in electrical installations, machinery, and metal structures, these washers offer high resistance to deformation. They are compatible with M-6 screws and made from quality materials that ensure durability.

Don't compromise the safety of your projects; choose our conical serrated washers for secure and firm connections.
