Description

The pack of 200 insulation panel fixing plugs is the perfect solution for ensuring efficient and durable installation. Designed for applications on compact and semi-elastic materials, these plugs feature a fixing spike that guarantees optimal hold.

We recommend their use on insulation materials such as mineral wool or cellular glass. With a diameter of 10 mm and lengths up to 190 mm, they are ideal for drilling holes with 8 mm bits. The pre-expansion zone prevents the plug from sinking into the material during installation.

- Dimensions: 34 cm x 29 cm x 38 cm.
- Easy and quick to install.
- High compatibility with various insulators.
- Perfect for professional work.

Don't miss the opportunity to optimize your insulation projects with this pack.
