Description

The Pack of 200 units insulation panel fixing plugs is the perfect solution for ensuring efficient and durable assembly. Designed for applications on compact and semi-light materials, these plugs feature a nylon nail reinforced with fiberglass, ensuring a secure fixing.

We recommend their use on polypropylene panels and other pressure-resistant insulators, such as mineral wool or cellular glass. Installation is quick: simply drill an 8 mm hole, insert the plug, and hammer it for expansion. The pre-expansion zone prevents the plug from being recessed during the process.

- Dimensions: Ø 10 mm, lengths up to 190 mm.
- Ideal for large-scale projects.

Optimize your work time with this efficient fixing system.
