Description

The Pack of 10 T. Wing Extra Bits 1/4, No. 5 is designed to deliver exceptional performance in professional work. These bits are made of steel with molybdenum and vanadium components, ensuring a hardness of 60-62 HRC that makes them extremely robust.

Recommended for use on soft and hard materials, these bits are perfect for universal applications. Their high wear resistance increases the product's lifespan, thus reducing long-term investment costs.

- Dimensions: 25mm
- Compatibility: TRI WING screws

Invest in quality and enhance your productivity with this high-performance bit pack.
