### Description

The 225 mm sanding discs are designed to provide efficient and clean sanding on walls and ceilings. Made from aluminum oxide, they ensure long-lasting performance and high sanding capacity, perfect for removing paint, putty, or plaster.

Recommended uses include intensive work on various surfaces, thanks to their velcro attachment system that allows for quick and secure changes. With 8 dust extraction holes, they ensure optimal dust removal, keeping the environment clean.

Compatible with all Ø225 mm sanders, these discs are ideal for both professionals and DIY enthusiasts. Available in various grits, they cover all sanding phases.
