Description

The 8-hole Ø125 mm sanding discs are the perfect solution for efficient and uniform sanding on various surfaces. Made from aluminum oxide, they offer great cutting capacity and wear resistance, ensuring long-lasting performance.

Recommended for use with orbital sanders, these discs are compatible with any model that has a velcro fastening system. Thanks to their 8 dust extraction holes, they ensure better dust removal, keeping the workspace clean and extending the life of the disc.

Available in grits 80, 120, and 180, they adapt to all sanding phases, from heavy grinding to fine finishing. Optimize your work with this pack of 5 units!
