Description

The PE insulating sleeve for Ø18 mm pipes and 1 m length is the perfect solution to protect and thermally insulate your installations. Made of closed-cell gray expanded polyethylene, it offers thermal resistance up to 100 °C, ideal for preventing freezing.

We recommend its use in heating and plumbing installations. Its design allows for easy handling and application, being compatible with pipes of different diameters. Additionally, its soundproofing and corrosion protection capabilities ensure the material's durability.

For optimal installation, it is advisable to use appropriate glue or adhesive tape to secure the joints between the pieces. Available in unit format or in packs of 15 units.
