Description

The pack of 3 polypropylene end caps PN16 is the perfect solution for sealing polyethylene pipes. Designed to withstand a nominal pressure of 16 bars, these caps are ideal for water conduction systems. Their black polypropylene construction, along with a blue nut, ensures durability and strength.

We recommend using them in plumbing and irrigation installations. Specifications include a height of 10 cm and a width of 10 cm, making them compatible with various applications. Don't compromise on the quality of your installations, choose our end caps.
