Description

The Georgia model generator with 389CC is the perfect solution for those seeking power and versatility. With a 4-stroke engine and automatic voltage regulation, this generator adapts to different loads, ensuring optimal performance.

Recommended for use on construction sites, events, and emergencies, it features two AC outputs and one DC output for battery charging. Its perimeter steel chassis ensures durability, while the removable handles and transport wheels facilitate mobility.

With a noise level of 96 dB, this generator is ideal for those needing reliable energy without compromising comfort.
