Description

Discover the pack of 5 pots with legs and drainage filter in white, made from WPC, a durable material that combines polypropylene and wood chips. These pots are perfect for enhancing any space, whether at home, in the office, on the balcony, or in the garden.

With a modern and minimalist design, each pot features detachable legs and a drainage hole that ensures the well-being of your plants. Its UV resistance guarantees that the color and shape remain unchanged over time.

Compatible with various decorative plants, this pack is ideal for those seeking quality and style. Order now and transform your space!
