Description

VDS VIDEO SWITCHER MODULE

The VDS Video Switcher Module is an advanced solution designed for the management and switching of video signals in professional environments. This device allows the integration of multiple video sources, facilitating smooth transitions between different inputs and ensuring superior image quality. Its compact and robust design makes it ideal for applications in television studios, live events, and video conferencing systems. With an intuitive interface, the VDS Video Switcher Module adapts to various configurations, offering flexibility and efficiency in audiovisual content handling.

- **Video inputs:** Supports multiple input formats, including HDMI, VGA, and component.
- **Video outputs:** Offers high-definition outputs to guarantee optimal quality.
- **Maximum resolution:** Compatible with resolutions up to 4K.
- **Fast switching:** Allows real-time source changes without interruptions.
- **User interface:** LCD screen for easy navigation and control.
- **Compatibility:** Works with most operating systems and video devices.
- **Dimensions:** Compact and lightweight, ideal for rack mounting.
- **Power supply:** Operates with a standard power adapter.
- **Operating temperature:** Designed to operate within a wide temperature range.
- **Certifications:** Complies with international quality and safety standards.

Specifications

High	6,3
------	-----

Width	2,4
EAN	8424299024509
Depth	9
