Sucko Delta Surface Socket 16A

Brand: GSC

Reference: GSC 103505001

The Sucko Delta surface socket is an electrical device designed for indoor installation, allowing the connection of electrical equipment with a maximum capacity of 16 amperes and a voltage of 250 volts. Made from high-quality plastic material (PC), this socket ensures adequate durability and resistance to normal environmental conditions. Its design allows for easy installation using screws, facilitating placement on various surfaces. With a maximum power of 3680 watts, it is ideal for everyday use in homes and offices. The IP20 rating indicates that this socket is protected against the entry of solid objects larger than 12 mm, making it suitable for use indoors where exposure to moisture is not expected. Its neutral white color allows for aesthetic integration in different decorative environments, maintaining a clean and professional appearance.

Description

The Sucko Delta surface socket is an essential component in the electrical infrastructure of any indoor space. This device is designed to provide a safe and efficient connection for a variety of electrical equipment. With a capacity of 16 amperes and a maximum voltage of 250 volts, the socket is suitable for most household appliances and power tools used in residential and commercial environments. Its construction from plastic material (PC) gives it adequate resistance to impacts and normal usage conditions, ensuring a long product lifespan.

Technical Features

- Maximum power: 3680 watts
- Maximum amperage: 16 amperes
- Maximum voltage: 250 volts
- Frequency: 50 Hz
- IP rating: IP20
- Material: Plastic (PC)
- Installation type: Surface, screw-mounted

Among the benefits of using the Sucko Delta surface socket are its ease of installation and robustness. The ability to support up to 3680 watts allows for the use of multiple devices without compromising safety. Additionally, its surface design facilitates access to the sockets, which is especially useful in environments where devices need to be frequently connected and disconnected. The IP20 rating ensures that the product is safe for indoor use, protecting the electrical components from the entry of solid objects. This socket is ideal for applications in homes,

offices, workshops, and other environments where reliable electrical connections are needed. Its design allows for use in various configurations, from workstations to break areas, adapting to the needs of each user. Furthermore, its white color allows it to easily integrate into any decor scheme, maintaining a professional and tidy appearance. The installation of the Sucko socket is straightforward and is done using screws, allowing for secure mounting on any suitable surface.

Specifications

Rated current (A)	16
EAN	8433373094833
Power (W)	3680
Protection	IP20
Nominal voltage (V)	250V
Type of installation	Surface
