Iron Cable Replacement 3G1mm Gray-White 2 m

Brand: EDM

Reference: EDM 03032

The 3G1 mm iron cable replacement of 2 meters is an essential component for the electrical connection of irons. This cable is made of tinned copper, ensuring excellent electrical conductivity and corrosion resistance. Its rubber coating provides flexibility and durability, while the extra-flexible textile lining allows for comfortable and safe handling. At one end, the cable features tubular terminals, facilitating connection to the iron, and at the other end, it incorporates a Schuko plug, ensuring a secure connection to the electrical network. This product is ideal for replacing damaged or worn cables, thus ensuring the proper functioning of the iron and the safety of the user. Its design in gray and white tones adapts to the aesthetics of most appliances, offering a practical and functional solution.

Description

The 3G1 mm iron cable replacement of 2 meters is a product designed to ensure the safe and efficient connection of electric irons. This cable is fundamental for the optimal operation of these appliances, as it allows the transmission of electrical energy from the network to the device. Made of tinned copper, this cable not only ensures excellent conductivity but also offers corrosion resistance, prolonging its lifespan. Its rubber coating is a key element that provides flexibility and resistance to different usage conditions, allowing the cable to adapt to various movements and positions without risk of damage.Technical FeaturesLength: 2 metersSection: 3G1 mmMaterial: Tinned copperCoating: Rubber with extra-flexible textile liningConnections: Tubular terminals at one end and Schuko plug at the otherColor: Gray-WhiteAmong the benefits of using this cable replacement is the improvement in the safety of the appliance, as a cable in good condition reduces the risk of short circuits and electrical failures. Additionally, its ergonomic and flexible design allows for more comfortable use, facilitating the handling of the iron during operation. This type of cable is especially useful for those who use the iron frequently, as it ensures consistent and reliable performance.The applications of this cable replacement are varied, being ideal for domestic use in clothing irons, as well as in professional environments where intensive use of these devices is required. Its ability to withstand high temperatures and its abrasion resistance make it suitable for different types of irons, regardless of brand or model.

Specifications

Colour	Grey
EAN	8427450356136
Manufacturer	MLUZ
Length	2 metros
Cable cross-section (mm²)	3x1
