White Door Stop with Swivel Holder

Brand: WOLFPACK LINEA PROFESIONAL

Reference: AFT 05320299

The door stop with swivel holder is a device designed to prevent doors from hitting walls, thus protecting both the door and the wall surface from potential damage. With a length of 103 mm, this stop is suitable for doors up to 7.5 cm thick. Its white plastic design gives it a clean and modern look, allowing it to easily integrate into any environment. This product can be installed in two ways: using a high-strength adhesive included in the package, or with a screw that is also provided. The adhesive installation is straightforward, as it only requires cleaning and drying the surface before pressing the stop in place. On the other hand, the screw installation provides a firmer hold, ideal for situations where greater stability is required. The swivel holder allows the door to remain open at different angles, facilitating access and ventilation in spaces. This door stop is a practical and functional solution for homes and offices, contributing to the durability of doors and walls.

Description

The door stop with swivel holder is an essential accessory for any home or workspace. Its main function is to prevent doors from hitting walls, which can cause damage to both doors and wall surfaces. This device, with a length of 103 mm, is suitable for doors that are up to 7.5 cm thick, making it a versatile option for various applications. Made of high-quality plastic and in an elegant white color, this stop adapts to different decor styles, maintaining the aesthetics of the place where it is installed.

Technical Features
Length: 103 mm
Compatible door thickness: up to 7.5 cm
Material: White plastic
Installation type: Adhesive or screw
Swivel holder: 360°

Among the benefits of using this door stop are the protection of surfaces against scratches and impacts, as well as the ability to keep the door open at different positions thanks to its swivel holder. This is especially useful in situations where ventilation or constant access to a room is needed. Additionally, its installation is quick and easy, allowing anyone to place it without the need for specialized tools. This type of door stop is ideal for use in homes, offices, schools, and other spaces where control over door movement is required. Its compact and functional design makes it perfect for any environment, as it does not take up additional space and integrates discreetly.

into the existing decor. Furthermore, its ability to prevent damage to doors and walls contributes to the longevity of these elements, representing long-term savings on repairs. The installation of the door stop can be done in two ways: using the included adhesive or with a screw. For adhesive installation, it is essential to clean and dry the surface well before applying the stop, ensuring optimal adhesion.
