

## Product sheet

## Waterproof Paint with Fibers 750 ml White

Brand: WOLFPACK LINEA PROFESIONAL

Reference: AFT 12011050

The waterproof paint with fibers for outdoor and indoor use is a high-quality acrylic coating designed to provide excellent water and liquid tightness. This product, presented in a 750 ml format, features a single-component water base that offers high elasticity and flexibility, allowing it to adapt to temperature variations and movement of the substrate. Its formulation includes fibers that reinforce resistance to tension and elongation until breakage, ensuring superior durability. Additionally, the paint is weather-resistant and UV-resistant, making it an ideal choice for protecting exposed surfaces. Its application is straightforward, and it is recommended to dilute the product with 10% water for the first coat, ensuring proper homogenization and adhesion to the substrate. This coating is especially effective in preventing leaks on terraces, rooftops, roofs, and expansion joints, providing a comprehensive solution for the protection of structures in both indoor and outdoor environments.

### Description

The waterproof paint with fibers is a product designed to provide an effective barrier against moisture and water on various surfaces. This coating, which comes in a 750 ml container, is ideal for both outdoor and indoor applications, thanks to its advanced formulation that includes fibers that enhance its resistance and durability. The technology used in its manufacturing allows the paint to be highly elastic and flexible, resulting in excellent adaptation to climatic conditions and structural movements.

**Technical Features**

- Color: White
- Format: 750 ml
- Base: Single-component water
- High elasticity and flexibility
- Tensile and elongation resistance
- Weather and UV resistance
- Excellent durability and abrasion resistance

Recommended for use with fiberglass mesh

Among the benefits of this paint is its ability to fill cracks and resist micro-cracking, making it an ideal choice for surfaces exposed to adverse conditions. Its formulation ensures a long lifespan, reducing the need for frequent applications and thus lowering maintenance costs. Furthermore, its easy application allows both professionals and DIY enthusiasts to use it without complications. The recommended applications for this paint are varied. It can be used on

terraces, rooftops, roofs, and expansion joints, as well as on any surface requiring effective protection against water infiltration. Its use is especially beneficial in humid climates or in areas where exposure to water is constant, ensuring that structures remain in optimal condition over time.Regarding installation, it is essential to properly prepare the substrate before application. This involves thoroughly cleaning the surface to remove dirt, grease, and other contaminants.
