HSS-Co Drill with Split Point Tip 9 mm

Brand: BLUEMASTER

Reference: EDM 16031

HSS-Co drill with split point tip of 9 mm, tip angle 130° and N-type helix 30°. Designed for precise drilling in resistant materials such as stainless steel, it offers stability during cutting and greater control in industrial applications.

Description

HSS-Co drill with 9 mm split point tip, specifically designed for precise drilling in resistant materials such as stainless steel. Its advanced technology and HSS-Co coating provide excellent wear resistance, while the split point tip improves stability during cutting, offering greater control and precision in industrial applications.

Technical Features

- Diameter: 9 mm
- Tip Angle: 130°
- N-type Helix: 30°
- Triple Flat Shank Anti-Slip

The drill allows for better chip evacuation during operation, reducing the risk of overheating and improving its durability. It is suitable for repetitive work in industrial environments where high precision and consistent performance are required.

Installation is simple thanks to the triple flat shank that facilitates its mounting on standard drills or machine tools, enabling efficient use in continuous and quality drilling processes.

Specifications

Diameter	9 mm
EAN	8422798817998
