Professional drill with spear point and hard carbon coating Ø5 mm

Brand: BLUEMASTER

Reference: EDM 16063

Professional drill with spear point and hard metal coating for drilling refractory materials such as porcelain, ceramic tiles, and hard ceramics. Diameter Ø5 mm, maximum 1100 rpm, requires constant water cooling during the process.

Description

Professional drill with sharp point and hard metal coating, designed to drill refractory materials such as porcelain, ceramic tile and hard ceramics. Its robust construction allows optimal performance in demanding industrial applications. This drill is specially adapted for use with machines operating up to 1100 rpm, requiring constant cooling during the process.

Technical specifications

- Diameter: 5 mm
- Depth: Ø5,00 mm
- Weight: 5 kg

It offers excellent wear resistance and extended service life in intensive work. It is suitable for precision applications in the ceramic and porcelain industries where high durability and performance are required.

Installation is performed using a standard fixing system, compatible with conventional drills. A constant flow of water is recommended during use to prevent overheating and ensure efficient drilling.

Specifications

Diameter	5 mm
