Description

Standard drill with sharp point of 10 mm designed for precise drilling in materials such as glass and porcelain. Its cutting technology ensures clean and accurate holes without causing cracks or damage to hard surfaces. This drill operates at a speed of 700 revolutions per minute, offering optimal performance in industrial and professional applications.

Technical Features

- Diameter: 10 mm
- Revolutions per minute (RPM): 700

Its sharp point allows controlled drill entry, avoiding deviations during the cutting process. It is especially useful in assembly, installation and repair work where precision in ceramic and vitrified materials is required.

The drill is easy to integrate with conventional drilling tools, facilitating its use in professional environments. Its robust design ensures efficient operation over long working periods without compromising cut quality.

Specifications

Diameter	10 mm
