Description

Triple front Schuko adapter of type 2P+T with thermal and overload protection, designed for safe electrical connections in residential and commercial installations. Its construction from high-quality thermoplastic material ensures durability and heat resistance. This device allows connecting equipment requiring up to 16 amps and a maximum voltage of 250 volts, making it suitable for demanding domestic and industrial applications.

Technical Specifications

- Color: White
- Rated Current: 16 A
- Maximum Voltage: 250 V~
- Connection Type: Schuko (2P+T)

Its triple front design offers greater flexibility in installation, facilitating use in spaces with multiple devices. It is especially useful for electric tools, office equipment, or lighting systems requiring a stable and safe power supply.

The installation is simple and straightforward: just insert the adapter into the corresponding socket without needing additional tools. It complies with European electrical standards, offering a reliable solution for residential or commercial environments.
