Description

Electric extension cord with one power outlet, designed to extend the availability of power points in spaces where there are not enough outlets. Its construction from durable material and integrated cable provide a practical and safe solution for connecting electronic devices without needing to search for a nearby socket. It is ideal for indoor use, thanks to its compact design and easy storage.

Technical Specifications

- Length: 5 m
- Protection: IP20

This product allows the safe connection of electrical devices with a maximum current of up to 16 A, thanks to its H05VV-F cable with 3 conductors of 1.5 mm². Its operating voltage range is 16-250 V~, making it compatible with most common household appliances and electronic equipment.

It is recommended for use in residential or office spaces where safe and simple extension of electrical power is required. It is especially useful in areas with limited outlet availability, such as offices or living rooms, allowing greater flexibility in energy distribution.
