Description

Electric kit designed for school educational projects that includes a low-power motor and 1 meter of cable. It facilitates connection and operation in science, technology, and engineering activities. Its simplicity allows easy integration into the classroom.

Technical Specifications

- Length: 1 m
- Length: 1 m

This kit allows experimentation with basic electrical circuits and understanding of motor operation in academic environments. It is especially useful for teaching fundamental principles of electricity and mechanics.

The installation is straightforward, without the need for special tools or advanced knowledge. It connects easily to the school's electrical system for immediate use in educational projects.
